PROFESSIONAL EXPERIENCE

Acharya Alumni Association

INTERNSHIP AT AES PVT LTD.

Acharya Alumni Association is a Web-based application build with Laravel framework which has features such as communication between alumni and current students. Organizing the event, Sharing job opportunities, etc.

Evertz Microsystems

SOFTWARE DEVELOPER INTERN

I was responsible for designing and developing an inhouse ERP system for Evertz Microsystem. Technologies like node.js, bootstrap 4 are being used.

LEBO Systems- (Lending and Borrowing Books)

APPLICATION BASED ON DBMS

This project idea is to build book hotspots on the campus so the students who are not able to afford books can borrow from others and who have books can make some pocket money by lending them. I used SQL HTML5 CSS3 PHP to build this project.

nextBus@Acharya

WEB APP IN JAVASCRIPT

People visiting for the first time in Acharya struggle waiting for buses so, this app shows the next bus arriving time, built using JavaScript.

Spot the ISS

LEAFLET MAP API

Tracking International Space Station using open-source data from, where the ISS API.

Result Checker BOT

PYTHON BASED PROGRAM

VTU results are always unexpected, so using Python I create an automated code that plays a piece of specified music when results are out.

Gradient Collection

CSS BASED WEB APPLICATION

Gradient Collection is a tool for web designers for selecting various gradient colors for their next project.
